

Creating Environmental Awareness Pamphlets

Today, you'll discover powerful topics for creating pamphlets that can inspire your communities to live more sustainably and understand our ecological impact. Each topic your group can choose to explore offers endless possibilities for research, creativity, and meaningful action.

Co-funded by the European Union

Before we start working - a short video

While we watch the clip from the World Wildlife Foundation, take notes and try to answer the questions below based on what the video says. We will discuss the questions after we have seen the video.

-How did we live before (when we lived in harmony with nature)?
-How did we get to where we are now?
-How do we deal with the problems our earth faces?

Creating an environmental pamphlet

1)One Norwegian per team must give their school e-mail to Cecilie or Maren. We will send you a template you can use to create your pamphlet.
2)Look through the remaining pages of this presentation. Choose one of the topics listed here (or another one if you have a good idea).
3)Do research on the topic in your group.
4)Fill in the relevant information in the pamphlet.
5)Send the finished pamphlet to Maren - ad115@bergensskolen.com
6)At about 11.10, you will be asked to present your pamphlet, so prepare to explain it to the rest of the students.

Plastic Pollution: The Ocean's Silent Enemy

Focus Areas for Your Pamphlet

- Microplastics in marine food chains
- Single-use plastic alternatives
- Ocean gyres and plastic islands
- Impact on marine wildlife
- Plastic recycling myths vs. reality

Research Suggestions

- Local beach cleanup data from your country
- Plastic consumption statistics in Europe
- Success stories of plastic bans
- Explain how plastic pollution affects both humans and animals

Plastic pollution affects every corner of our planet, from the deepest ocean trenches to the highest

Climate Change: Understanding Our Changing Planet

Rising Global Temperatures

Research local temperature changes in Belgium, Turkey, or Norway over the past 50 years. Include data on extreme weather events and their increasing frequency. Your pamphlet could feature before-and-after photos of glaciers or seasonal changes in your region.

Carbon Footprints

Calculate and compare carbon footprints of different daily activities. Show how transportation choices, diet, and energy use contribute to emissions. Include practical tips for reducing personal carbon footprints that teenagers can actually implement.

Renewable Energy Solutions

Highlight renewable energy projects in your country. Research government policies supporting clean energy and showcase local success stories. Your pamphlet could inspire readers to advocate for renewable energy in their schools and communities.

Biodiversity Loss: Protecting Our Natural Heritage

Endangered Species

Focus on species threatened in your region - from Norwegian Arctic foxes to Turkish monk seals to Belgian bats. Research conservation efforts and success stories. Include ways students can support wildlife protection through citizen science projects.

Habitat Destruction

Document local habitat loss through urban development, agriculture, or tourism. Your pamphlet could feature maps showing forest cover changes or wetland losses. Suggest community actions like creating wildlife corridors or native plant gardens.

Pollinators in Crisis

Explore the decline of bees, butterflies, and other pollinators crucial for food production. Research pesticide impacts and climate effects. Your pamphlet could include instructions for building bee hotels or planting pollinator-friendly gardens.

Food Waste: A Global Challenge with Local Solutions

Staggering Statistics to Include

One-third of all food produced globally is wasted - that's 1.3 billion tons annually! In Europe alone, households waste about 88 million tons of food each year. Your pamphlet could highlight how this waste contributes to greenhouse gas emissions and squanders precious resources like water and farmland.

Research Topics

- Food waste in school cafeterias
- Cultural attitudes toward food in your country
- Food rescue organizations and apps
- Composting programs and benefits
- "Best by" vs. "use by" date confusion

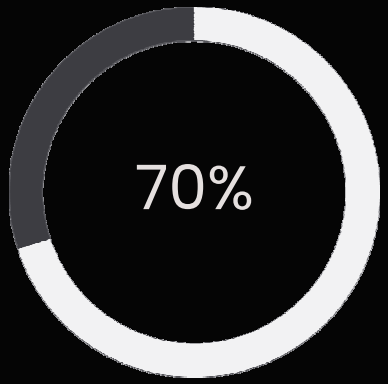

Action Ideas for Communities

- Start a school food sharing program
- Organize cooking classes for leftover ingredients
- Create community composting initiatives
- Launch awareness campaigns about proper food storage

Water Conservation: Every Drop Counts

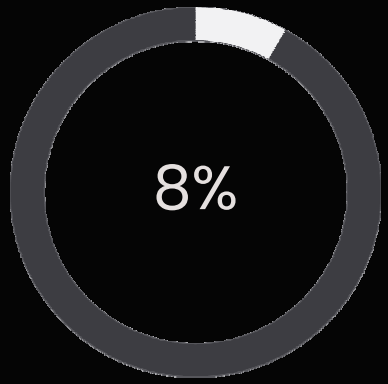

Agriculture's Share

Of global freshwater usage goes to agriculture. Research water-efficient farming techniques and drought-resistant crops being developed in your region.

Industrial Usage

Industrial processes consume significant water resources. Investigate how local industries in Belgium, Turkey, or Norway are improving water efficiency.

Household Use

While smallest percentage, household conservation efforts add up quickly. Research simple water-saving techniques families can implement immediately.

Pamphlet Focus Ideas

Your water conservation pamphlet could address local water quality issues, rainwater harvesting techniques, or the hidden water costs in everyday products. Research your country's water policies and highlight successful conservation programs in schools or communities.

Sustainable Transportation: Moving Toward a Greener Future

Active Transportation

Research cycling infrastructure in your city and advocate for better bike lanes. Your pamphlet could include maps of safe cycling routes, health benefits of biking, and interviews with local cyclists. Calculate emissions saved by choosing bikes over cars for short trips.

Public Transit Innovation

Investigate electric buses, train electrification, and transit improvements in Belgium, Turkey, or Norway. Feature success stories of cities that have transformed their public transportation systems. Include tips for making public transit more appealing to young people.

Electric Vehicle Revolution

Research EV adoption rates in your country and government incentives supporting electric transportation. Your pamphlet could explore charging infrastructure development and interview local EV owners about their experiences transitioning from traditional vehicles.

Sustainable Fashion: Rethinking Our Wardrobe Choices

Fast Fashion's Hidden Costs

The fashion industry produces 92 million tons of textile waste annually and is responsible for 10% of global carbon emissions. Your pamphlet could expose these shocking statistics while highlighting sustainable alternatives that are both trendy and environmentally friendly.

Research Focus Areas

- Water pollution from textile dyeing
- Working conditions in fast fashion factories
- Microfiber pollution from synthetic clothing
- Local sustainable fashion brands
- Clothing swap and repair initiatives

Actionable Solutions

- Organize school clothing swaps
- Learn basic clothing repair skills
- Support local, ethical fashion brands
- Create capsule wardrobes
- Upcycle old clothing into new designs

Your Voice, Your Impact: Creating Change Through Awareness - tips and tricks

01

Choose Your Focus

Select an environmental issue that resonates with your group and your local community. Consider what matters most in your region and where you can make the biggest impact through awareness and action.

02

Research Thoroughly

Gather local data, interview experts, and find compelling stories. Use reliable sources like government reports, scientific studies, and environmental organizations. Include both problems and solutions in your research.

03

Design for Impact

Create visually appealing pamphlets with clear messages, striking images, and actionable steps. Make your content accessible and engaging for your target audience. Include QR codes linking to additional resources.

04

Share and Inspire

Distribute your pamphlets in schools, community centers, and local events. Use social media to amplify your message. Track your impact and celebrate the positive changes your awareness campaign creates.

Remember, every great environmental movement started with passionate individuals who refused to stay silent. Your pamphlets have the power to educate, inspire, and mobilize your communities toward a more sustainable future. The planet needs your voice, creativity, and determination now more than ever!
